WIEHAG *TOP* FORMWORK PANELS

COST-EFFICIENT, DIMENSIONALLY STABLE, DURABLE!

WIEHAG *TOP* formwork panels meet even the highest requirements of structural engineering. Their secret is based on one of WIEHAG's special fortes: Continuous optimization performed by our in-house R&D department. Effective material combinations and technological development provide for lots of advantages, ensuring top quality at fair prices.

ADVANTAGES TO BUILD ON

- **Cost savings** of up to € 30.-/m² and more due to the extremely hard panel surface, affording a much higher number of uses.
- Unique WIEHAG **colour concept** (apart from yellow, our formwork panels are available in seven other special colours against surcharge) ensuring their clear identification as high-grade plywood and preventing early cutting up on site.
- Further **cost savings** (approx. 20 %) in terms of **supporting material** due to the statically optimized design of 3 x 9 mm.
- Exact **dimensional accuracy** due to state-of-the-art fabrication technologies.
- **Great variety of sizes:** The WIEHAG formwork panels are available in several sizes (small, large and special sizes).
- **Nail and impact proof** to the outer edge due to continuous intermediate ply of board (no concealed edge band), which also prevents the breaking of longitudinal edges.
- **House advertising** possible, thus also providing **theft protection** as your company name is imprinted on the panel surface.

With PU edge sealing!

WIEHAG *TOP*

NEW! WIEHAG TOP WITH PU EDGE SEALING

By introducing the PU edge sealing WIEHAG is setting new standards in quality and efficiency.

The grey PU edge sealing

- saves time and thus costs due to easier cleaning,
- prevents staining of the edge,
- provides for lower crack formation
- and reduces the absorption of humidity.

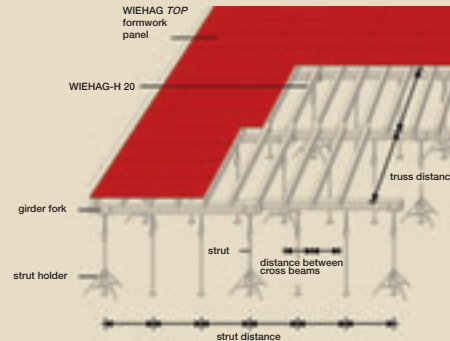

This makes the WIEHAG TOP formwork panel the ideal solution – for concrete formwork to stage assemblies and vehicle bodies to shelves, pallets and marquee floors.

Available surface colours:

Construction:	Symmetrical construction of select wood laminas (3 x 9 mm), alternative thicknesses (e.g. 21 mm) as well as special thicknesses available
Sizes:	<ul style="list-style-type: none"> – Small sizes 50 cm in width, lengths: 100, 150, 200, 250, 300 cm – Large sizes 50 cm in width, lengths: 350, 400, 450, 500 cm – Large sizes 100 cm in width, lengths: 100, 150, 200, 250, 300, 400, 450, 500 cm – Special sizes up to max. 125 cm in width and 500 cm in length; special cuts possible on request
Colours:	Standard surface colour: yellow (seven other colours on request), PU edge sealing: grey

Example of ceiling formwork

WIEHAG-H20 WOOD FORMWORK BEAMS

THE SOLUTION FOR ALL REQUIREMENTS.

The sturdy, solid-walled all-purpose formwork beam for wall and ceiling formworks, with rounded edges.

- Height: 20 cm
- Width: 8 cm (flange), ca. 3 cm (web)
- Lengths: 245, 250, 290, 330, 360, 390, 450, 490, 590, 600 cm; special lengths on request

Company imprint possible on request.
