

FOR EVERY CONNECTION ONE SOLUTION

EVERYTHING FROM A SINGLE SOURCE!

Our design team develops and optimises all the necessary connection details for you. From the simple slotted plate to the elaborate stanchion foot or junction – where standard connections stop, we find the suitable connection.

OUR ASPIRATIONS:

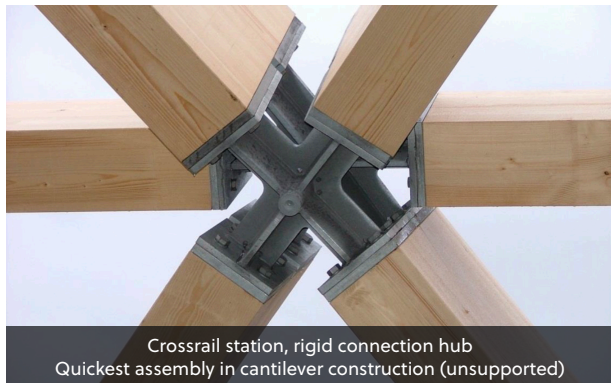

- As simple as possible, as complex as necessary
- Structurally optimised and visually appealing
- As much prefabrication as possible in factory assembly
- Ready-to-assemble kits can be joined together in just a few simple steps

THAT'S WHY WE OFFER YOU:

- Engineering (structural consulting and static analysis)
- Structural design – complete solutions for your building project
- Fireproof coatings, corrosion protection

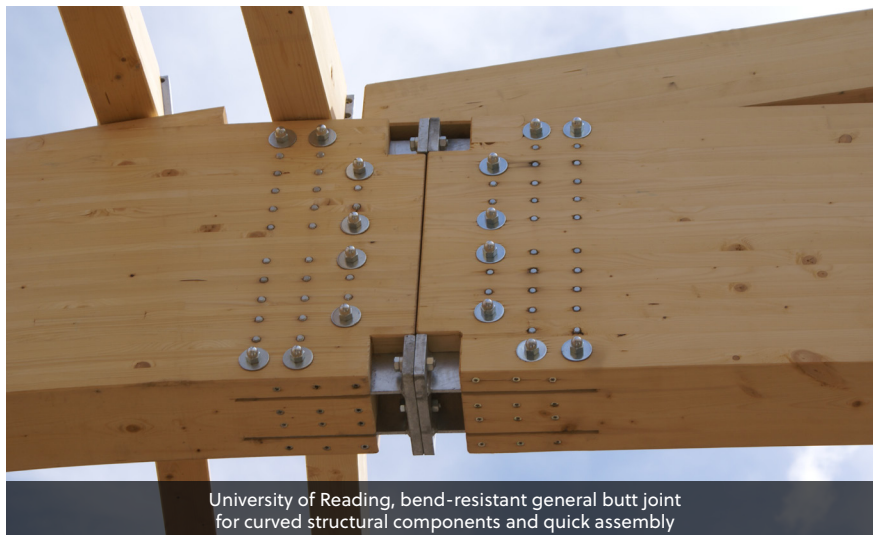

Miesbach auction hall
WIEHAG frame corner with ridge hub

Crossrail station, rigid connection hub
Quickest assembly in cantilever construction (unsupported)

GVZ Ingolstadt rail track roofing, trussed arched beams,
completely pre-assembled at factory

University of Reading, bend-resistant general butt joint
for curved structural components and quick assembly
